## About us

**1 Characteristic features** **coating** is essential reading in German and English for the executives, buyers and decision makers of Europe's vibrant coating and converting industry. Established more than 40 years ago, **coating** publishes valuable information about coating and converting processes for a broad range of substrates like foils and films, paper, textiles, and nonwoven materials. Further topics include the production and chemistry of adhesives, printing inks or lacquers as well as new technologies such as nanotechnology. **coating** covers the synergies between all branches involved in the field of coating and converting. Our editorial team visits the world's major coating, converting and print exhibitions to provide our readers with comprehensive information.

## Data Information

### Digital documents

Our prepress department mainly uses Apple Macintosh computer platforms. The table below lists all the programs and data formats that we prefer to use:

<b>Text</b>	Text drafts in Microsoft Word for Macintosh saved as *.txt, *.rtf, *.doc
<b>Spreadsheets</b>	Microsoft Excel, saved as *.xls
<b>Pictures</b>	Adobe Photoshop CMYK, Grayscale line art (Bitmap) output format with dimensions according to resolution of 300 dpi saved as *.jpg, *.tif, *.eps
<b>Graphics</b>	Adobe Illustrator, saved as *.eps, *.ai
<b>Finished pages</b> (open Data)	Adobe InDesign, QuarkXPress with pictures and fonts saved as *.idml, *.qxd
	Adobe Acrobat press-optimized, fonts embedded Documents saved as *.pdf

Please consider that within the delivered pdf-data (only of the PDFX-3-standard) very few corrections can be made. Our data check only concerns:

- Format
- Trim (of 3 mm)
- Colours (CMYK and grayscale)

We do not check provided advertisements for grammar and style. Advertisement motifs must be delivered as digitized printing data – with at least 300 dpi resolution.

**Please consider that artwork cannot be processed, if delivered as word, excel or power-point files.**

We only accept digitized data (on CD/USB) for Macintosh with a print/proof or manuscript.

The publishing house does not assume any liability for deviations (i.e. missing text parts), if it does not receive a print/proof of the advertisements or manuscripts. To achieve the best result, the data should be supplied uncompressed i.e. as TIF or EPS files. In order to avoid complications with fonts, all the fonts used in the data set/files (for the printer and the screen) must be supplied or converted into paths.
